

PHD RESEARCHER IN AGRICULTURAL ECONOMICS AND POLICY (M/F)

Agricultural Institute of Slovenia is looking for a new researcher in the Agricultural Economics Department, in the field of agricultural economics and environmental studies.

Description of work tasks

- research of adaptation of agriculture to climate change and other topics related to agricultural economics and environmental studies,
- review of the Common Agricultural Policy (CAP), environmental policies, legislation, and other strategic documents by adapting agriculture to new environmental challenges (e.g. climate change, negative impacts of agriculture on the environment, etc.),
- review of current research and models for assessing the adaptation of agriculture to climate change (at national and international level),
- cooperation with researchers in the field of climate change adaptation research in related sciences,
- writing research papers and publications,
- applying for research projects.

Expected profile

- Required education: PhD
- Field of education: agriculture, environmental protection or other relevant fields
- Good knowledge of English or German language
- Knowledge of MS Office programs (mainly Word and Excel) and working with databases
- Practical experience in agriculture or related fields is an advantage
- High literacy level
- Good communication and organizational skills
- Independence and proactivity
- Ability to work in a team

We offer

- The advertised position at the Agricultural Economics Department allows for long-term employment, where the first contract is concluded for a fixed period of one year with a three-month trial period.
- An interesting working environment, in a young collective, where there are many opportunities for interdisciplinary research and collaboration.
- Environmental challenges are becoming more and more important in ensuring the sustainable development of agriculture. Therefore, this position offers opportunities to research new areas related to agriculture, the environment, and society, and thus opportunities for further career development.

Interested candidates are invited to send:

- A motivational letter summarizing the qualifications and experience, indicating how the expected set of competencies for this position are met
- Curriculum vitae
- A list of publications

to the address:

kadri@kis.si

The closing date for application is 30 November 2022.

Candidates will be informed about the results by e-mail provided in the CV.
